

## Ohio Revised Code

### Section 5.071 State invertebrate fossil.

Effective: September 19, 1985

Legislation: House Bill 145 - 116th General Assembly

---

Isotelus, a genus of extinct marine arthropod of the class Trilobita, that lived in the seas that covered Ohio during the Ordovician period, about four hundred forty million years ago, and represented by the largest known complete trilobite, collected at Huffman dam in Montgomery county, is hereby adopted as the official invertebrate fossil of the state.
