

Ohio Administrative Code

Rule 1501:20-5-02 Minimum ice requirements.

Effective: February 28, 1974

(A) Ice thickness for the operation of a snowmobile or all-purpose vehicle upon the frozen surface of any waters controlled by the State and designated by the Department as permissible for such operation shall be determined by the operator.

(B) The Department recommends a minimum ice thickness of five (5) inches, but offers no guarantee of safety to any person who voluntarily assumes a known and obvious risk inherent to such vehicle operation.
