

Appendix C Table 3 to Rule 901:10-2-14: Nitrogen rates for wheat based on yield potential

| Yield Potential bu/acre | Nitrogen rate pounds N to apply/acre |
|-------------------------|--------------------------------------|
| 50 | 40 |
| 70 | 75 |
| 90+ | 110 |

1. N rate is based on the relationship:
$$N \text{ (lb/acre)} = 40 + [1.75 \times (\text{yield potential} - 50)]$$
2. No nitrogen credits are made based on previous crop.
