

Ohio Administrative Code

Rule 1301:3-11-12 Monitoring of inspections and testing.

Effective: November 1, 2024

At the division's request, a licensed elevator contractor or licensed elevator mechanic shall notify the division when the licensee will be performing a safety test of a conveyance subject to Chapters 4105. and 4785. of the Revised Code. The division may request notice as to a specific licensee, specific type of conveyance, specific location as to where a safety test will be performed, or any combination thereof. The notice provided by the licensee shall inform the division of the time, place, and type of safety test(s) that the licensee intends to perform and shall be given in such a manner so as to permit the division to monitor the test as it is being performed. Failure to provide notice of a safety test as required by this rule may result in the division deeming the safety test invalid and requiring the safety test to be performed again.
