

## Ohio Administrative Code

### Rule 1501:14-3-13 Controlled placement of lime mining wastes (LMW).

Effective: June 27, 2024

---

Transportation, placement, and compaction.

(A) When transporting, placing and compacting LMW, the permittee is to comply with all applicable emission controls required by Chapter 3704. of the Revised Code and the rules thereunder;

(B) LMW is to be placed in a controlled manner to prevent mass movement;

(C) The placement area is to be constructed to minimize the infiltration of water;

(D) The placement area is to be within the permit, shown as affected or proposed to be affected, and bonded;

(E) The final configuration is to be compatible with the natural drainage pattern and surroundings and suitable for intended uses;

(F) The design of the LMW placement area is to be certified by a qualified registered engineer in conformance with professional standards;

(G) The permittee shall minimize disturbances of and adverse impacts of the operation on fish, wildlife, and related environmental values, and achieve enhancement of such resources where practicable; and

(H) The placement and use of LMW shall be protective of human health and the environment and not damage public or private property.
