

Ohio Administrative Code

Rule 3357:15-16-11 Disposal of surplus equipment.

Effective: [May 25, 2026](#)

Equipment is considered surplus once it has surpassed its useful life. This occurs when equipment is broken and repair costs exceed fifty per cent of the value of the item, is obsolete, or is no longer needed by the department. Items being traded in towards the purchase of another item must first be deemed surplus and must follow this same procedure prior to being traded.
