

Ohio Administrative Code Rule 3701-22-32 Patient selection criteria.

Effective: August 31, 2025

- (A) An extra-renal, solid organ transplant service will use written patient selection criteria in determining a patient's suitability for placement on the waiting list or a patient's suitability for transplantation.
 - (B) Patient selection criteria will comply with the organ procurement and transplantation network (OPTN) organ allocation priorities and be based on objective medical criteria.
 - (C) Patient selection criteria will include a psychosocial evaluation.
 - (D) Patient selection criteria will ensure a fair non-discriminatory distribution of organs and be in compliance with centers for medicare and medicaid services (CMS) and OPTN oversight.
 - (E) Documentation of the patient selection criteria utilized will be included in the patient's medical record.
-
