

Ohio Administrative Code

Rule 3701-22-42.1 Inspection and review of adult cardiac catheterization services.

Effective: August 31, 2025

(A) In addition to the inspection and audit requirements set forth in rule 3701-22-05 of the Administrative Code, the director will conduct an inspection of each adult cardiac catheterization service approximately once every three years.

(B) The number of procedures performed by the service may be considered by the director in conjunction with other indicators of quality and not as the sole indicator of the service's performance.

(C) Failure to maintain a volume of cardiac catheterization procedures sufficient to ensure the safety and quality of procedures performed at the service and individual cardiologist proficiency may result in any or all of the following:

(1) An extended review of the service by the director;

(2) Mandatory peer review of PCI procedures performed by the service;

(3) Annual inspections until such time as the service performs the established number of procedures for a period of two consecutive years or the director determines that annual inspection is no longer required; or

(4) At the discretion of the director, the establishment of a probationary period. If a probationary period is imposed, at a minimum, the service will be notified of the following:

(a) The time period for which the probationary period is effective;

(b) The actions that may be taken by the director for a service's failure to successfully complete the probationary period.
