

Ohio Administrative Code

Rule 3701-84-84 Pediatric cardiovascular surgery service - performance measures.

Effective: August 1, 2017

-
- (A) Each provider of a pediatric cardiovascular surgery service should meet a volume goal of at least one hundred pediatric procedures per year by the second full year of operation, of which seventy-five are pediatric cardiovascular surgeries, to ensure efficiency and a minimum floor of competency.
- (B) Volume goals shall be considered by the director in conjunction with other indicators of quality and not as the sole indicator of service performance.
- (C) Failure to meet a volume goal for two consecutive years may trigger an extended review of the pediatric cardiovascular surgery service by the director including possible inspections.
- (D) No minimum per surgeon volume is recommended, however, the combination of high risk adjusted mortality and low volume shall trigger a thorough internal review of an individual physician by the provider of the pediatric cardiovascular surgery service.
-
