

## Ohio Administrative Code

### Rule 3745-103-17 Fast-track modifications.

Effective: December 5, 2025

---

(A) Fast-track modifications shall follow the following procedures:

- (1) The designated representative serves a copy of the fast-track modification on the USEPA, the director, and any person entitled to a written notice of a draft permit under the Ohio EPA's permit regulations adopted under rule 3745-77-08 of the Administrative Code and within five business days of serving such copies, also give public notice by publication in a newspaper of general circulation in the area where the source is located or in a state publication designed to give general public notice.
- (2) The public has a period of thirty days, commencing on the date of publication of the notice, to comment on the fast-track modification. Comments will be submitted to the director and to the designated representative.
- (3) The designated representative submits the fast-track modification to the director on or before commencement of the public comment period.
- (4) Within ninety days of the close of the public comment period, the Ohio EPA considers the fast-track modification and the comments received and approve, in whole or in part or with changes or conditions as appropriate, or disapprove the modification. A fast-track modification is subject to the same provisions for review by the USEPA and the director as are applicable to a permit modification under rule 3745-103-16 of the Administrative Code.

(B) All of the following permit revisions are, at the option of the designated representative submitting the permit revision, either fast-track modifications under this rule or permit modifications under rule 3745-103-16 of the Administrative Code:

- (1) Incorporation of a compliance option that the designated representative did not submit for approval and comment during the permit issuance process.
