

Ohio Administrative Code

Rule 3745-103-37 Current promulgated SO₂ emissions limit.

Effective: December 5, 2025

The designated representative shall submit the following data:

- (A) Current promulgated SO₂ emissions limit of the combustion source, expressed in pounds per MMBtu, which will be the most stringent federally enforceable emissions limit that has been promulgated as of the date of submission of the opt-in permit application and that either is in effect on that date or will take effect after that date. If the promulgated SO₂ emissions limit is not expressed in pounds per MMBtu, the limit will be converted to pounds per MMBtu by multiplying the limit by the appropriate factor as specified in Table 1 of rule 3745-103-35 of the Administrative Code.
- (B) Citations of statute, regulation and any other authority under which the emissions limit under paragraph (A) of this rule is established as applicable to the combustion source.
- (C) Averaging time associated with the emissions limit under paragraph (A) of this rule.
- (D) Effective date of the emissions limit under paragraph (A) of this rule.
