

## Ohio Administrative Code

### Rule 3745-5-14 Ambient water quality monitoring requirements.

Effective: May 11, 2018

---

(A) The ambient water quality monitoring plan shall include sufficient information for the director to do the following:

(1) Determine if there have been negative impacts to water quality.

(2) Document the presence or absence of any improvements to water quality.

(B) The ambient water quality monitoring plan shall provide all of the following:

(1) Include a list of chemical, biological and stream habitat parameters being monitored.

(2) Provide the sampling frequency for each parameter being monitored.

(3) Provide the location of each sampling site.

(4) Identify the methods and procedures used to monitor each parameter.

(C) The director may require the applicant to submit additional information if the information submitted pursuant to paragraph (B) of this rule will not enable the director to determine if the trading activities have resulted in positive or negative impacts to water quality.

[Comment: For guidance on study plan design, sample collection, analytical methods, data assessment, and quality assurance and quality control procedures that are appropriate for the ambient water quality monitoring required under this rule, see the appendices to rule 3745-4-05 of the Administrative Code.]
