

Ohio Administrative Code

Rule 3745-525-320 Procedure for a permit to install and operate for a CCR unit.

Effective: October 1, 2026

Upon receipt of a complete application for a permit to install and operate under rule 3745-525-310 of the Administrative Code, the director shall do the following:

- (A) Consider the application and accompanying information to determine whether the application complies with agency rules and the requirements of rule 3745-525-315 of the Administrative Code.
- (B) Issue a draft permit or a notice of intent to deny the permit.
- (C) Provide public notice of the issuance of the draft permit to install and operate or the notice of intent to deny the application that includes the following:
 - (1) A sixty-day comment period and the name and address of an Ohio EPA contact person to whom written comments shall be sent for consideration.
 - (2) If significant interest is shown, a minimum thirty-day notice of the date, time, and location of the public meeting to be held not later than fifteen days prior to the close of the public comment period in the county in which the facility is or will be located.
- (D) Within one hundred eighty days of determining that the application is complete, issue or propose to deny a permit to install and operate a CCR Unit.
- (E) Issue or deny the permit to install and operate in accordance with Chapters 3745. and 119. of the Revised Code and Chapters 3745-47 and 3745-49 of the Administrative Code.
