

Ohio Administrative Code Rule 3745-87-05 Long-term implementation.

Effective: April 11, 2025

- (A) The water system shall annually review and update the asset management program.

- (B) Metrics shall be kept onsite and available for review at the discretion of the director and be reviewed and documented annually by the public water system, unless otherwise required by the director. The following operational metrics will be required for the specified system type:
 - (1) Community public water systems.
 - (a) Operating ratio.
 - (b) Operating cost to produce water per service connection.
 - (c) Breaks per one-hundred miles of distribution pipe.
 - (d) Non-revenue water (percentage loss).
 - (e) Time spent on planned maintenance tasks per year and time spent on unplanned maintenance tasks per year for vertical assets.
 - (2) Nontransient noncommunity public water systems.
 - (a) Documentation of incidents where system pressure was not maintained in accordance with Chapter 3745-83 of the Administrative Code.
 - (b) Repair, rehabilitation or replacement tasks per year (emergency versus planned).
 - (c) Reserve funds.

(d) Number of days unable to serve water.
