

## Ohio Administrative Code

### Rule 4713-1-06 Medical facilities offering cosmetology services.

Effective: May 20, 2019

---

A medical facility that also provides services within a branch of cosmetology shall not be required to have a salon license if a licensed medical professional is the first point of contact and prescribes, delegates, or administers a service that is within the scope of practice for the license, permit, or certificate of the medical professional. If the medical professional is not the first point of contact and an individual licensed by the board can practice a branch of cosmetology in the facility without a prescription or other formal authorization from the medical professional, then the facility must obtain a salon license for the branch of cosmetology practiced in the facility.
