

Ohio Administrative Code

Rule 4906-6-02 Types of accelerated applications.

Effective: July 2, 2026

- (A) Except as provided in paragraphs (C) and (D) to rule 4906-6-03 of the Administrative Code, an accelerated certificate application shall be submitted as either a letter of notification application or a construction notice application, as outlined in the appendix to rule 4906-1-01 of the Administrative Code.
- (B) If a project meets the requirements of both a letter of notification application and construction notice application, a letter of notification application shall be filed.
- (C) If a project that qualifies for accelerated review is an associated facility of another project or projects subject to accelerated review before the board, the projects may be combined into one accelerated certificate application. These applications should be in the same form, meaning that if any of the associated projects require a letter of notification application, the combined application should follow the requirements for letter of notification applications outlined in this chapter.
