

Ohio Administrative Code Rule 5122-2-10 Tuberculosis control program.

Effective: July 12, 2018

Each RPH shall develop and follow a tuberculosis control plan that is based on the risk classification of the facility. The control plan and facility risk assessment shall be consistent with the United States centers for disease control and prevention "guidelines for preventing the transmission of mycobacterium tuberculosis in health care settings, 2005," MMWR 2005, Volume 54, No. RR-17 and any additional requirements set forth by the Ohio department of health in rule 3701-15-03 of the Administrative Code.
