

## Ohio Administrative Code

### Rule 901:10-2-12 Contents of manure management plan: methods to minimize odors.

Effective: January 1, 2026

---

(A) A manure management plan shall include best management practices to minimize odors. These best management practices shall be identified in the manure management plan and be compatible with the overall content of the manure management plan. These best management practices may include, but are not limited to, the following:

- (1) Remove, transfer and land apply manure at optimum temperatures;
- (2) Remove, transfer and land apply manure when wind direction is less likely to affect neighboring residences;
- (3) Immediately inject manure;
- (4) Incorporate manure within twenty-four hours following land application to minimize odors; or
- (5) If manure is applied by spray irrigation, use appropriate pressure and nozzles.

(B) Additional controls on odor are included in the appendix to rule 901:10-2-06 of the Administrative Code. The information appended to rule 901:10-2-06 of the Administrative Code includes manure storage or treatment facilities that control and promote additional treatment reduction of odor.
