

Ohio Administrative Code Rule 901:13-1-05 Other waste waters.

Effective: August 19, 2024

(A) Each owner, operator, animal manure applicator or person responsible shall prevent pollution to waters of the state from residual farm products, milking facility waste waters and process generated waste waters.

(B) Animal feeding operations found by the director or the director's designee to have failed to implement best management practices to prevent pollution from residual farm products, milking facility waste waters, and process generated waste waters and have caused pollution to waters of the state shall design, construct, operate, and maintain such facilities in accordance with the criteria in the "Field Office Technical Guide" or other methods approved by the director or the director's designee.
