

Ohio Administrative Code

Rule 901:9-1-25 Platform safe working load.

Effective: December 28, 1992

- (A) The safe working load (SWL) shall be determined by the maximum weight on the platform at any one time, with a safety factor of not less than five times the maximum designed loaded platform weight.
 - (B) When the platform is not an integral part of the structure, the attachment devices and the part of the structure to which they are attached, shall have a safety factor of at least five over the total load.
 - (C) The platform shall have a non slip surface.
 - (D) The platform shall have anchor points for safety harnesses, designed and placed to best suit the movements of anyone on the platform.
 - (E) There shall be a gate across the jump point which shall remain closed when a jumper is not present.
 - (F) The jump master shall stop the jumping operation when wind speeds are in excess of twenty miles per hour and can affect the safe operation on the jump platform and/or the recovery area.
-
