

3745-30-09 Appendix

(1) Industrial landfill or residual landfill facility cap design options:

(a)

(b)

(2) Cap over disposed waste generally having a permeability less than 1×10^{-5} cm/sec:

SCPL is soil cap protection layer, with the top six inches capable of sustaining vegetation

FML is flexible membrane liner

CSBL is cap soil barrier layer

GCL is geosynthetic clay liner
