

3745-270-40 Applicability- treatment standards.

- (A) A prohibited waste identified in the table in this rule “Treatment Standards for Hazardous Waste” may be land disposed only if the prohibited waste meets the requirements in the table in this rule. For each waste, the table in this rule identifies one of three types of treatment standard requirements:
- (1) All hazardous constituents in the waste or in the treatment residue shall be at or below the values in the table in this rule for that waste (“total waste standards”).
 - (2) The hazardous constituents in the extract of the waste or in the extract of the treatment residue shall be at or below the values in the table in this rule (“waste extract standards”).
 - (3) The waste shall be treated using the technology specified in the table in this rule (“technology standard”), which are described in detail in the table in rule 3745-270-42 of the Administrative Code.
- (B) For:
- (1) Wastewaters, compliance with concentration level standards is based on maximums for any one day, except for D004 to D011 wastes for which the previously promulgated treatment standards based on grab samples remain in effect.
 - (2) All nonwastewaters, compliance with concentration level standards is based on grab sampling.
 - (3) Wastes covered by the waste extract standards, the test method 1311, the toxicity characteristic leaching procedure in “Test Methods for Evaluating Solid Waste, Physical/Chemical Methods,” U.S. EPA publication SW-846, shall be used to measure compliance. An exception is made for D004 and D008, for which either of two test methods may be used: method 1311, or method 1310B, the extraction procedure toxicity test.
 - (4) Wastes covered by a technology standard, the wastes may be land disposed after being treated using that specified technology or an equivalent treatment technology approved by the director under the procedures in paragraph (B) of rule 3745-270-42 of the Administrative Code.
- (C) When wastes with differing treatment standards for a constituent of concern are combined for purposes of treatment, the treatment residue shall meet the lowest treatment standard for the constituent of concern.

- (D) Notwithstanding the prohibitions specified in paragraph (A) of this rule, treatment and disposal facilities may demonstrate [and certify pursuant to paragraph (B)(5) of rule 3745-270-07 of the Administrative Code] compliance with the treatment standards for organic constituents specified by a footnote in the table in this rule, provided all of the following conditions are satisfied:
- (1) The treatment standards for the organic constituents were established based on incineration in units operated in accordance with the technical requirements of rules 3745-57-40 to 3745-57-51 of the Administrative Code, or based on combustion in fuel substitution units operating in accordance with applicable technical requirements in the hazardous waste rules.
 - (2) The treatment or disposal facility has used the methods referenced in paragraph (D)(1) of this rule to treat the organic constituents.
 - (3) The treatment or disposal facility may demonstrate compliance with organic constituents if good-faith analytical efforts achieve detection limits for the regulated organic constituents that do not exceed by an order of magnitude the treatment standards specified in this rule.
- (E) For characteristic waste (D001 to D043) that are subject to treatment standards in the table in this rule, and are not managed in a wastewater treatment system that is regulated under the Clean Water Act (CWA), that is CWA-equivalent, or that is injected into a “Class I” nonhazardous deep injection well, all “underlying hazardous constituents” (as defined in rule 3745-270-02 of the Administrative Code) shall meet universal treatment standards in the table in rule 3745-270-48 of the Administrative Code prior to “land disposal” (as defined in rule 3745-270-02 of the Administrative Code).
- (F) The treatment standards for F001 to F005 nonwastewater constituents carbon disulfide, cyclohexanone, or methanol apply to wastes which contain only one, two, or three of these constituents. Compliance is measured for these constituents in the waste extract from test method 1311. If the waste contains any of these three constituents along with any of the other twenty-five constituents in F001 to F005, then compliance with treatment standards for carbon disulfide, cyclohexanone, or methanol is not required.
- (G) [Reserved.]
- (H) Prohibited D004 to D011 mixed radioactive wastes and mixed radioactive listed wastes containing metal constituents that were previously treated by stabilization to the treatment standards in effect at that time and then put into storage do not have to be re-treated to meet treatment standards in this rule prior to land disposal.
- (I) [Reserved.]

- (J) The treatment standards for the wastes specified in rule 3745-51-33 of the Administrative Code as EPA hazardous waste numbers P185, P191, P192, P197, U364, U394, and U395 may be satisfied by either meeting the constituent concentrations presented in the table in this rule, or by treating the waste by the following technologies: combustion, as described by the technology code CMBST in the table in rule 3745-270-42 of the Administrative Code, for nonwastewaters; and, biodegradation as described by the technology code BIODG, carbon adsorption as described by the technology code CARBN, chemical oxidation as described by the technology code CHOXD, or combustion as described as technology code CMBST in the table in rule 3745-270-42 of the Administrative Code, for wastewaters.

Table: Treatment Standards for Hazardous Wastes

The treatment standards that previously appeared in tables in rules 3745-59-41, 3745-59-42, and 3745-59-43 of the Administrative Code have been consolidated into this table.

EPA hazardous waste number	Waste description and treatment or regulatory subcategory ¹	Regulated hazardous constituent		Wastewaters	Nonwastewaters
		Common name	CAS ² number	Concentration ³ in mg/L; or technology code ⁴	Concentration ⁵ in mg/kg unless noted as “mg/L TCLP”; or technology code ⁴
Footnotes:					
NA	NA means not applicable.				
1	The waste descriptions provided in this table do not replace descriptions in Chapter 3745-51 of the Administrative Code. Descriptions of treatment or regulatory subcategories are provided, as needed, to distinguish between applicability of different standards.				
2	CAS means chemical abstract services. When the EPA hazardous waste number or regulated constituents are described as a combination of a chemical with its salts or esters, the CAS number is given for the parent compound only.				
3	Concentration standards for wastewaters are expressed in mg/L and are based on analysis of composite samples.				
4	All treatment standards expressed as a technology code or combination of technology codes are explained in detail in the table in rule 3745-270-42 of the Administrative Code.				
5	Except for “Metals (EP or TCLP)” and “Cyanides (total and amenable)” the nonwastewater treatment standards expressed as a concentration were established, in part, based upon incineration in units operated in accordance with the technical requirements of rules 3745-57-40 to 3745-57-51 or 3745-68-40 to 3745-68-52 of the Administrative Code, or based upon combustion in fuel substitution units operating in accordance with the applicable technical requirements. A facility may comply with these treatment standards according to provisions in paragraph (D) of this rule. All concentration standards for nonwastewaters are based on analysis of grab samples.

		Common name	CAS ² number	Concentration ³ in mg/L; or technology code ⁴	Concentration ⁵ in mg/kg unless noted as “mg/L TCLP”; or technology code ⁴
6	Where an alternate treatment standard or set of alternate standards has been indicated, a facility may comply with this alternate standard, but only for the “Treatment or Regulatory Subcategory” or physical form (i.e., wastewater or nonwastewater) specified for that alternate standard.				
7	Both “Cyanides (total)” and “Cyanides (amenable)” for nonwastewaters are to be analyzed using method 9010C or method 9012B in “Test Methods for Evaluating Solid Waste, Physical/Chemical Methods,” U.S. EPA publication SW-846 with a sample size of ten grams and a distillation time of one hour and fifteen minutes.				
8	These wastes, when rendered nonhazardous and then subsequently managed in Clean Water Act (CWA), or CWA-equivalent systems, are not subject to treatment standards. [See paragraph (C)(3) and (C)(4) of rule 3745-270-01 of the Administrative Code.]				
9	These wastes, when rendered nonhazardous and then subsequently injected in a “Class I SDWA” well are not subject to treatment standards. [See 40 CFR 148.1(d).]				
10	The treatment standard for this waste may be satisfied by either meeting the constituent concentrations in this table, or by treating the waste by the specified technologies: combustion, as described by the technology code CMBST in the table in rule 3745-270-42 of the Administrative Code, for nonwastewaters; and biodegradation as described by the technology code BIODG, carbon adsorption as described by the technology code CARBN, chemical oxidation as described by the technology code CHOXD, or combustion as described by the technology code CMBST in the table in rule 3745-270-42 of the Administrative Code, for wastewaters.

		Common name	CAS ² number	Concentration ³ in mg/L; or technology code ⁴	Concentration ⁵ in mg/kg unless noted as “mg/L TCLP”; or technology code ⁴
11	For these wastes, the definition of CMBST is limited to: (1) combustion units operating under Chapter 3745-266 of the Administrative Code, (2) combustion units permitted under rules 3745-57-40 to 3745-57-51 of the Administrative Code, or (3) combustion units operating under rules 3745-68-40 to 3745-68-52 of the Administrative Code, which have obtained a determination of equivalent treatment under paragraph (B) of rule 3745-270-42 of the Administrative Code.				
12	Disposal of K175 wastes that have complied with all applicable treatment standards in this rule shall also be macroencapsulated in accordance with the table in rule 3745-270-45 of the Administrative Code unless the waste is placed in: (1) A permitted hazardous waste landfill containing only K175 wastes that meet all applicable treatment standards in this rule; or (2) A dedicated permitted hazardous waste landfill cell in which all other wastes being co-disposed are at pH less than or equal to 6.0.
