

Ohio Revised Code

Section 3701.952 Questionnaire to examine maternal behaviors and experiences before, during, and after pregnancy and during early infancy.

Effective: April 6, 2017

Legislation: Senate Bill 332 - 131st General Assembly

(A) The department of health shall create a population-based questionnaire designed to examine maternal behaviors and experiences before, during, and after a woman's pregnancy, as well as during the early infancy of the woman's child. The questionnaire shall collect information that is similar to the information collected by the pregnancy risk assessment monitoring system (PRAMS) questionnaire that the department most recently used prior to the effective date of this section, as well as any additional information suggested by the United States centers for disease control and prevention (CDC) for PRAMS questionnaires.

(B) The department shall implement and use the questionnaires created under division (A) of this section in a manner that is consistent with the standardized data collection methodology for PRAMS questionnaires prescribed by the CDC model surveillance protocol. In addition, for the purpose of having statistically valid data for local analyses, the department shall oversample women in Cuyahoga, Franklin, and Hamilton counties on an annual basis, and shall oversample women in the remaining counties that constitute the Ohio equity institute cohort (Butler, Stark, Mahoning, Montgomery, Summit, and Lucas counties) on a biennial basis.

(C) The department shall report results from the questionnaires not less than annually in a manner consistent with guidelines established by the CDC for the reporting of PRAMS questionnaire results.
