

## Ohio Revised Code

### Section 4511.131 Lane-use control signal indications.

Effective: June 30, 2025

Legislation: House Bill 54

---

The meanings of lane-use control signal indications are as follows:

- (A) A steady downward green arrow means that the lane over which the arrow signal indication is located is open to vehicle travel in that direction.
  - (B) A steady yellow "X" means that the lane over which the signal indication is located is about to be closed to vehicle traffic in that direction and will be followed by a steady red "X" signal indication, either within the same signal face or in a downstream signal face.
  - (C) A steady white two-way left-turn arrow means that the lane over which the signal indication is located is open to traffic making a left turn from either direction of travel, but not for through travel.
  - (D) A steady white one-way left-turn arrow means that the lane over which the signal indication is located is open to traffic making a left turn in that direction, without opposing turns in the same lane, but not for through travel.
  - (E) A steady red "X" means that the lane over which the signal indication is located is closed to vehicle traffic in the direction viewed by the road user.
-
