

Ohio Revised Code

Section 4511.15

Effective: June 30, 2025

Legislation: House Bill 54

Bicycle symbol signal indications have the following meanings:

(A) A steady green bicycle signal indication means that bicyclists are permitted to enter the intersection only to make the movement indicated by the lane-use arrow displayed on the bicycle signal sign that is located immediately adjacent to the bicycle signal face. Bicyclists proceeding into the intersection during the display of the indication shall yield the right-of-way to both of the following:

(1) Pedestrians lawfully within an associated crosswalk;

(2) Other vehicles lawfully within the intersection.

(B) A steady yellow bicycle signal indication means that bicyclists are warned that the related green movement is being terminated and that a steady red bicycle signal indication will be displayed immediately thereafter when bicyclists shall not enter the intersection. The provisions governing bicyclist operations under the movement being terminated continue to apply while the steady yellow bicycle signal indication is displayed.

(C)(a) A steady red bicycle signal indication means that bicyclists shall not enter the intersection to make the movement indicated by the lane-use arrow displayed on the bicycle signal sign that is located immediately adjacent to the bicycle signal face. Unless the bicyclist is entering the intersection to make another movement permitted by another bicycle symbol signal indication, the bicyclist shall stop at a clearly marked stop line; but if there is no stop line, shall stop before entering the crosswalk on the near side of the intersection; or if there is no crosswalk, shall stop before entering the intersection; and shall remain stopped until a green bicycle signal indication to proceed is displayed.

(b) Except when a traffic control device is in place prohibiting a turn on red, bicyclists facing a

steady red bicycle signal indication are permitted to enter the intersection to turn right if there are no approach lanes for motor vehicle traffic to their right. The right to proceed with the turn is subject to the provisions that are applicable after making a stop at a stop sign.

(D) A flashing green bicycle signal indication and a flashing yellow bicycle signal indication have no meaning and shall not be used.

(E) A flashing red bicycle signal indication means that bicyclists shall stop at a clearly marked stop line; but if there is no stop line, shall stop before entering the crosswalk on the near side of the intersection; or if there is no crosswalk, shall stop at the point nearest the intersecting roadway where the bicyclists have a view of approaching traffic on that roadway before entering the intersection. The right to make the movement indicated by the lane-use arrow displayed on the bicycle signal sign that is located immediately adjacent to the bicycle signal face is subject to the provisions that are applicable after making a stop at a stop sign.
