

## Ohio Revised Code Section 4729.09 Reciprocity.

Effective: July 22, 1998

Legislation: Senate Bill 66 - 122nd General Assembly

---

The state board of pharmacy may license an individual as a pharmacist without examination and issue an identification card to the pharmacist if the individual:

- (A) Holds a license in good standing to practice pharmacy under the laws of another state, has successfully completed an examination for licensure in the other state, and in the opinion of the board, the examination was at least as thorough as that required by the board at the time the individual took the examination;
- (B) Is of good moral character and habit;
- (C) Has filed with the licensing body of the other state at least the credentials or the equivalent that were required by this state at the time the individual was licensed a pharmacist.

The board shall not issue any identification card or license to an individual licensed in another state if the state in which the individual is licensed does not reciprocate by granting licenses to practice pharmacy to persons holding valid licenses received through examination by the state board of pharmacy.
